### MINIATURE ROSES

We have long been interested in the miniature rose. Heretofore, it seemed to us that they were somewhat hard to grow. Recently, we found this strain, which the grower has worked toward ease of culture. We have selected varieties which seem to us to be the hardiest and best for the home gardener.

THESE ARE NOT FLORIBUNDA ROSES! They are true miniatures, which for the most part grow to a height of only one foot. Some are climbers which grow to a height of only four feet.

Miniature roses are excellent to dot among a planting of conifer evergreens to give the planting life and color. They may be used as a low hedge; even trimmed square, like a boxwood hedge. Trimming only stops blooming for a short time. Miniature roses make fine pot plants for the patio, or porch. There are so many uses for them that we cannot enumerate them all.

Miniature roses are hardy. They will thrive in any climate where tea roses can be grown, and may be wintered over with just about the same protection. Like tea roses, they are overblooming. The tiny jewel-like flowers are excellent for bouteniers, or small arrangements. Again, the uses of cut miniature roses are myriad.

As a package deal for the beginner, we offer the following:

1 "Bit O' Sunshine--An easy to grow rose in a buttercup yellow.

This is a 1957 introduction and is priced at \$2.00

1 Little Buckaroo-- A tiny red rose bush, which grows to a height of about 15 inches. Wonderful for arrangements. priced at \$1.50

1 Pink Joy A fragrant pink variety patented. Priced at \$1.25

1 Polka Dot-- A new white introduction Priced at \$1.50

A \$6.25 value for \$5.00 postpaid.

We reserve the right to substitute in the event that stock of any one variety becomes short, but will bend every effort to send you all four colors.

#### Climbing miniatures:

Pink Cameo-- Little flowers are so perfect that they look as if they were carved from cameo. Perfect rose pink buds. Long lasting flowers. Climbs to four or five feet. \$2.00 each postpaid.

Redhead--Grows and blooms like pink cameo, but the color is red. \$2.00 each postpaid.

To be introduced in the spring of 1957:

WHITE ASTER-- Not available before April. Tiny white flowers that resemble a double white aster. Bush type, free blooming.

\$2.00 Postpaid

We also list,--prior to subject to prior sale:

THUMBELLINA--a bright red bush type

WHITE FAIRY--A very double white bush type.

\$1.25 postpaid.

### FUCHSIAS FOR 1957

This year, we are offering five new fuchsia introductions. All five have been garden tested in our area. We believe that fuchsias tested in this way, under less favorable conditions will be more satisfactory in your garden. Other fine new fuchsias will be offered next season, as soon as we have given them a season of testing. Thus we try to always give you the best in modern fuchsias.

This year, we proudly offer the following varieties by Mr Horace Tietz, and tested in Southern California:

LUNADO--Large double corolla of Tyrian purple with pronounced maroon overshadows as the blossom matures. Sepals are pink and crimson. Long willowy branches arch gracefully from center stems. Basket, espalier, or staked upright. Heat resistant.

THUNDERBIRD--A very fine natural cascading self branching profuse blooming plant. It's large double Cherry Red corolla with orange shadings make a very spectacular show. Very long gracefully twisted sepals of pink and delicate crimson add much to an overall effect. Heat resistant in every way.

SWEET LEILAN I--Large soft silvery pink and orchid corolla with pale ivory flushed delicately pink sepals. Very compact in growth with lush green foliage. Basket.

By Mr. Harry Nelson, we offer:

SOMBRERO--A large double brilliant rose with a thick fleshy tube and sepals that are light pink on the outside and deeper pink on the inside. The large thick gracefully recurved sepals resemble a mexican hat. Hence the name "SOMBRERO". This fuchsia has been thoroughly tested, It has remained large and well formed, even under adverse conditions. Has stood terrific heat without wilting or fading.

From Home Fuchsia Gardens we present:

MARIE--A natural trailing lush growing plant with large cup-like single corolla of deep sea lavender fading to phlox pink. Sepals ivory tipped with pale green. Named for Mrs Marie Peterson for her fine work in the California-National Fuchsia Society.

We have selected the following patented fuchsias as outstanding:

BALI HI--Double blue-violet corolla with lighter sepals slightly variegated.

ENCHANTED--Very large double blue and lilac corolla with dark pink sepals. Profuse bloomer of trailing growth. Basket.

PAPA BLEUSS--Very large deep bishop's violet corolla with crimson sepals. Staked upright or basket.

STREAMLINER--Long twisted red corolla with red sepals. Basket.

WOODOO--Large double deep violet corolla with dark red sepals. Basket or upright.

ALL 1957 FUCHSIAS, and patented varieties are \$1.00 postpaid. in U.S.A.

- We grow many, many others. Send us your want list.

LIST OF PLANTS  
Spring 1957

Please read before ordering

We are proud to send you this Spring 1957 list of plants. We are constantly in search of plants that are different, just for your house and garden. If there is any plant that you would like for your collection, let us know. Perhaps we can put you in touch with a grower. In the mild climate of Southern California, there are many specialty growers.

We have debated for a long as to whether we would put out a nice printed list with pictures or just a list like this one. We came to the conclusion that a nice catalogue would be nice, but would have to be reflected in higher prices to our customers.

Prices are postpaid in the U.S. We do suggest that people East of the Mississippi River, take advantage of air mail. We cannot guarantee live arrival of softer plants, like fuchsias by ordinary parcel post.

We have shipped plants by air to long distant points, and have had safe arrival. Our customers are from all over the world. for air mail, please add 25¢ for the first plant, and 15¢ for each additional plant.

Plants are grown by us, in our inspected nursery, or are grown for us by specialty growers, who are also inspected. Plants are inspected before being shipped to us. We pride ourselves on having clean healthy plants.

Make all checks and money orders to:

KENNETH TERRY  
2314 Harriman Lane  
Redondo Beach  
California.

TERMS: Cash with order, unless other arrangements are made at the time of ordering.

We offer in addition to the miniature roses and fuchsias on the following pages, these hardy perennials:

DIANTHUS--Rose Cushion- A tiny mound-like plant with bright rose-pink flowers in spring and early summer. An excellent rock garden plant.

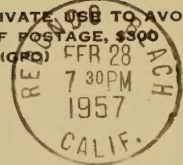

DIANTHUS--Wallace Red--One of the hybrid types. A low growing plant about one foot in height, blooming with a profusion of tiny bright red flowers of the "Pink" type.

CAMPANULA--"Rockclyffe"--A recent introduction. Low mounds of refreshing lavender-blue. A good rock garden plant. Spring flowering.
